

## Dynamics of prices for milk in Ukraine

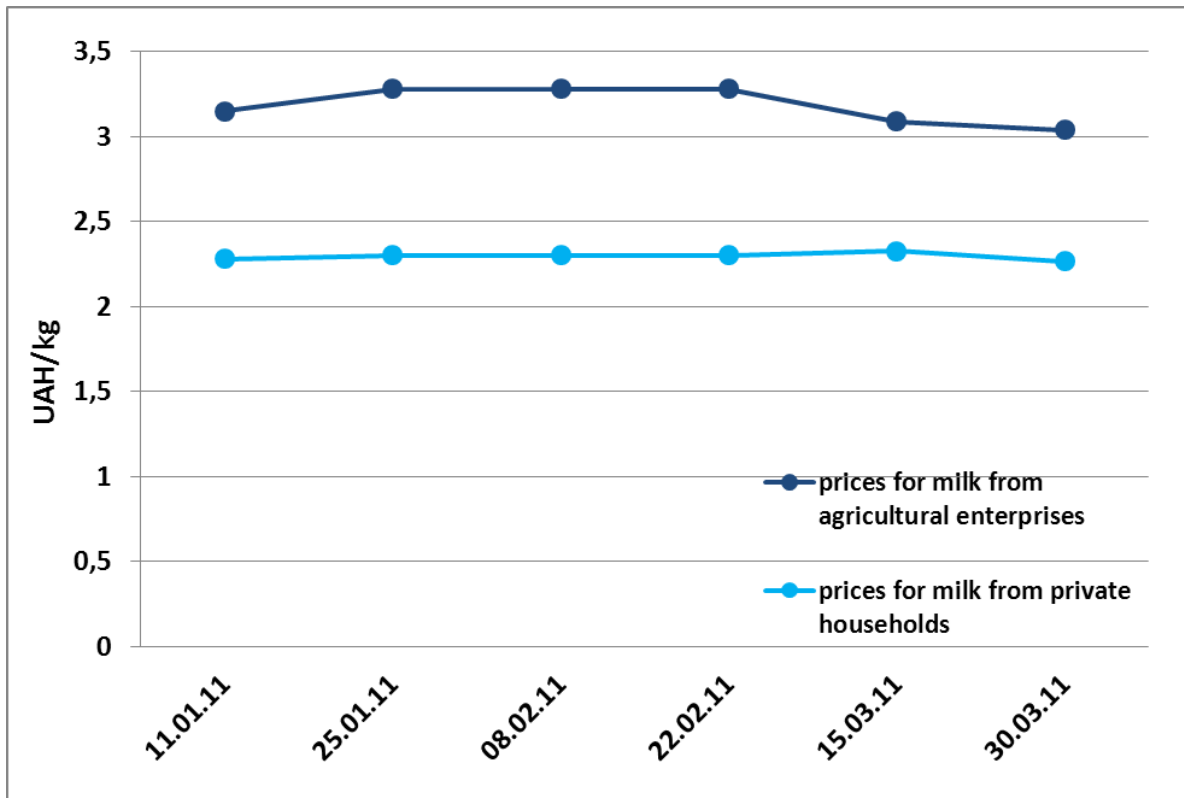

Average prices for milk from agricultural enterprises in March decreased by 5% (-0.16 UAH / kg) and amounted to 3.12 UAH / kg. Milk from farm-members of UDA (Ukrainian Dairy Producers) was the highest. This is primarily due to the high quality production. The price for milk from private households remained unchanged (2.3 UAH / l). According to processing enterprises, in April the price for milk will start to decline significantly, due to increase in the supply of this production.

\* The price for milk from the population is listed in UAH/liter.
