

**Dynamics of prices for milk in 2010
(processing enterprises data)**

* the price for milk is indicated in UAH/l

**Dynamics of prices for milk (by week)
(processing enterprises data)**

* the price for milk is indicated in UAH/l

The New Year has brought to dairy producers reduction in purchase prices. This step is caused by a change of subsidies payment to milk and meat producers under the new Tax Code.

Thus, from January 1, 2011 grants for milk and meat producers won't be paid per kilogram of put products but per head, held by the farm at beginning of January 1, 2011.

Due to changes in the mechanism of subsidies payment procurement prices for milk decreased by the amount of subsidies, that is 15-20% depending on the processing enterprise. As for January 11, 2011 following prices for milk are fixed: for agricultural enterprises - average price was 3.0 UAH / kg, for the private households - 2.0 UAH / liter.
