

## Dynamics of prices for milk

In September this year, purchase prices for milk were going up starting from June 2011. It was caused by the struggle of milk processing enterprises for raw materials suppliers because of the milk reduction.

Seasonal reduction in overall production influenced price formation too.

According to the website analytical department MilkUa.info, in September, prices for milk from agricultural enterprises were 3.6 UAH/kg, it is 6.4% (0.2 UAH/kg) more than in the previous month. Milk from private households cost 2.55 UAH/l, which is 11.7% (0.25 UAH/l) higher than in August this year.

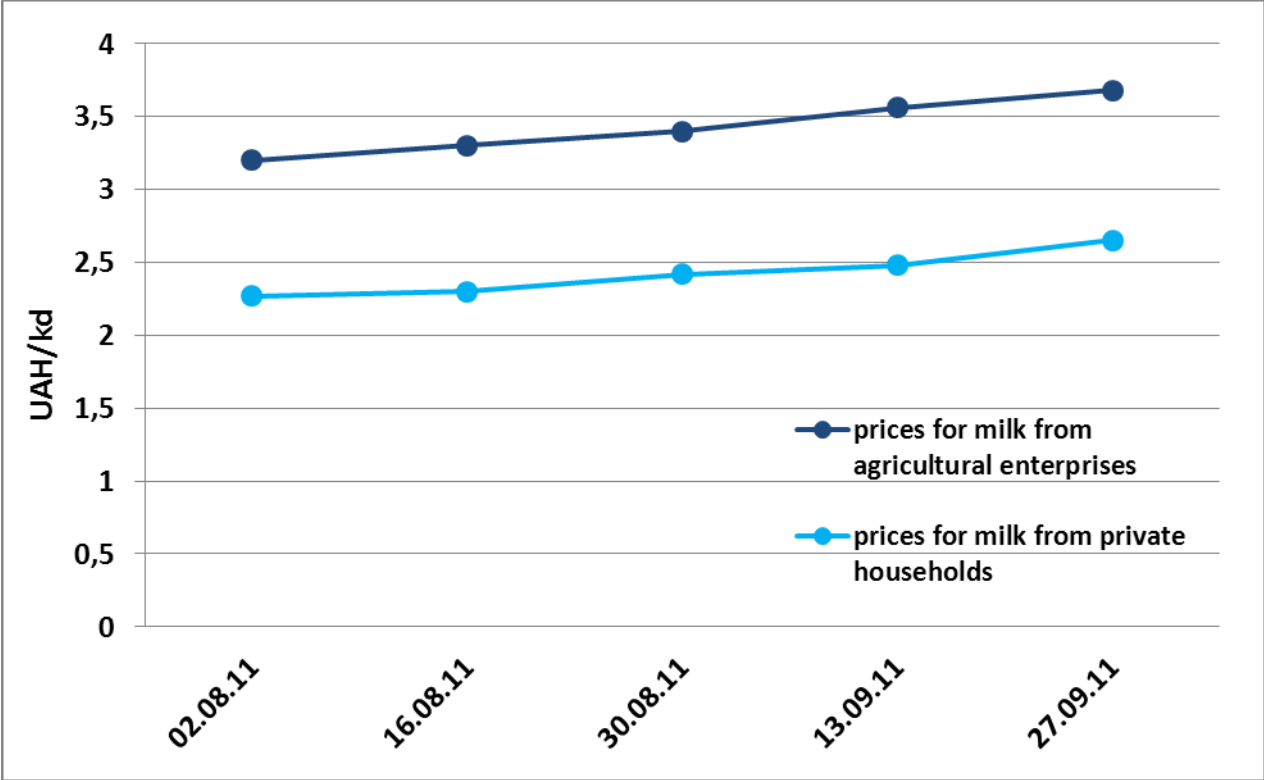

The price for milk from farms, which are members of Ukrainian Dairy Association traditionally is high. In September, the price up by 5.1% (0.2 UAH/kg) and cost 4.1 UAH/kg.
